Professional Summary

Full-stack developer with hands-on experience building scalable web applications using Django, React, TypeScript, PostgreSQL, and REST APIs. Graduate of the ALX Pro Backend Engineering program and GoMyCode Full Stack JavaScript bootcamp, with practical experience developing backend APIs, frontend interfaces, and modular application architectures. Comfortable working with Git/GitHub, Linux environments, Docker basics, and collaborative software engineering workflows. Passionate about clean code, scalable systems, and continuous learning.

Technical Skills

Languages

- Python
- JavaScript
- TypeScript
- SQL
- HTML5
- CSS3

Frontend

- React
- Tailwind CSS

- React Hook Form
- TanStack Query

Backend

- Django
- Django REST Framework (DRF)
- Node.js
- Express.js

Databases

- PostgreSQL
- MongoDB

Tools & DevOps

- Git
- GitHub
- Docker (Basic)
- Linux Command Line
- GitHub Actions (Basic)

Other

- REST APIs
 - Authentication Systems
 - Responsive UI Design
 - Form Validation
 - Software Debugging
 - Agile/Jira-style Workflows
-

Featured Projects

ALX Project Nexus

[Repository Link](#)

- Collaborated on a full-stack software project using modern frontend and backend technologies.
- Worked on frontend UI implementation, API integration, and application structure.
- Applied clean coding practices, Git workflows, and modular architecture concepts.
- Contributed to scalable frontend and backend feature development.

Technologies

Pytho, Django, PostgreSQL, Git

ALX Travel App

[Repository Link](#)

- Built travel-focused web application features with frontend/backend integration.
- Worked with REST APIs, relational database concepts, and responsive UI development.
- Improved reusable component architecture and frontend state handling.
- Implemented modular React component workflows.

Technologies

Django, REST APIs, PostgreSQL

CodeAlpha Social Platform

[Repository Link](#)

- Developed social platform functionality including authentication and interactive user features.
- Implemented frontend/backend communication workflows and reusable components.
- Strengthened understanding of scalable application structure and full-stack integration.
- Worked with API handling and user interaction flows.

Technologies

React, JavaScript, Node.js, PostgreSQL

Professional Experience

Coding Instructor (Part-Time)

2025

- Taught coding fundamentals to Grade 9–12 students.
 - Assisted students with HTML, CSS, JavaScript, and beginner programming concepts.
 - Improved technical communication, mentoring, and problem-solving skills.
-

Education

Bachelor of Business and Information Technology

St. Paul's University

Professional Training & Certifications

ALX Pro Backend Engineering Graduate

Certificate:

[ALX Certificate](#)

GoMyCode Full Stack JavaScript Program

Certificate:

Relevant Strengths

- Comfortable working from Jira tickets and structured task requirements
- Strong problem-solving and debugging skills
- Experience building backend APIs and frontend workflows
- Familiar with collaborative Git/GitHub workflows
- Able to write clean, maintainable, and documented code
- Comfortable working in Linux development environments
- Quick learner with strong adaptability in fast-paced engineering environments
